WORK EXPERIENCE

Business Applications Support & Cybersecurity Officer

Apr 2024 – Present

Valeo · Sousse, Tunisia

- Ensure high availability and performance of critical Windows & Linux infrastructure through proactive monitoring, troubleshooting, patching and preventive maintenance.
- Administer Commvault backup & disaster recovery solutions, executing restore testing to ensure business continuity and data integrity.
- Design and execute DRP/BCP strategies for critical manufacturing systems including MES, OPC Servers and industrial infrastructure.
- Provide L2 support for SAP MM/SD & Procurement modules resolving integration and IDoc-related issues to ensure business continuity.
- Deploy and maintain DELMIA Apriso (MES) and support MES/SCADA integration in accordance with Valeo Production System (VPS) requirements.
- Integrate PLC/VFD industrial equipment into IT infrastructure, ensuring secure communication between shopfloor systems, OPC and enterprise platforms.
- Administer SQL Server & Oracle databases optimizing performance, availability and business reporting.
- Lead network segmentation, L2VPN and industrial connectivity initiatives, ensuring cybersecurity compliance (TISAX / ICS standards).
- Monitor infrastructure through Grafana dashboards, proactively identifying risks and performance bottlenecks.
- Ensure IT asset compliance, governance and cross-functional coordination between IT, production teams and external vendors.

Lead IT Specialist

Jan 2024 – Mar 2024

Leoni Wiring System · Monastir, Tunisia

- Led and mentored a team of 5 IT specialists, improving productivity, collaboration and service delivery across production sites.
- Planned, coordinated and executed system upgrades and migrations, ensuring continuity of business and manufacturing operations.
- Architected scalable, robust IT infrastructure solutions – servers, virtualization (VMware), AD, networking – tailored to organizational goals.
- Established and enforced comprehensive security protocols, compliance frameworks and disaster recovery plans.
- Improved database and system performance through optimization, security hardening and data integrity enforcement.
- Monitored system performance logs proactively, identifying and resolving issues before production impact.
- Produced detailed IT performance reports; collaborated cross-functionally to streamline processes and reduce operational disruptions.

IT Specialist

Sep 2020 – Jan 2024

Leoni Wiring System · Monastir, Tunisia

- Administered enterprise-wide Windows Server infrastructure (AD, DNS, DHCP, GPO, file services) ensuring stability and high availability.
- Delivered technical support achieving near-zero downtime; cut system downtime by 40% through proactive monitoring.
- Supervised 200+ endpoints (desktops, laptops, mobile); reduced ticket resolution time by 35% through streamlined support processes.
- Implemented a computerized identity management system, improving compliance, access control and operational efficiency.
- Conducted regular security audits and risk assessments, strengthening overall IT security posture.
- Coordinated software deployments and patch management ensuring security compliance and smooth rollouts.
- Maintained and enhanced Active Directory infrastructure and scripted backup solutions.
